## Vision & Mission

You are here: Home / Vision & Mission

### Our Vision

To achieve excellence in delivering quality education of global standards, coupled with innovative practice using advanced technology and expertise transforming the student community into potential global leaders with accountability to meet the social, national and dynamic global challenges.

### Our Mission

To create and nurture learning and knowledge based environment, conducive to the pursuit of quality education which would transform a socially responsible generation to act on their professional values and beliefs.

To bring about their overall personality development, fostering a caring and creative environment that emphasizes physical, social and intellectual development.

To instill a sense of understanding, remarkable resilience and enduring adaption to a diverse, competitive and dynamic society.

The mission of the trust is to empower young men and women to face the challenges of life with courage and commitment to be builders of a human and a just society and to promote a learning community in which all, especially those from less privileged backgrounds, feel part of the collaborative high quality educational process which is value based and leads to holistic growth.

## Department of Chemistry

You are here: Home / Department of Chemistry

About

Vision

Mission

Faculty Details

The Department of Chemistry promotes a culture of intellectual engagement centered on the physical sciences. This culture is shared by a community of undergraduate students, faculty and staff. The faculty members are teacher-scholars who are dedicated to excellence in teaching and are deeply engaged in the production and dissemination of new knowledge. Using modern pedagogy in the classroom and collaborations between students and faculty in research, it is the goal of the faculty to instill in all students a sense of scientific inquiry that employs systematic, experimental and computational approaches to making and analyzing materials relevant to society and the natural world. The current community of faculty and students studies chemistry related to analytical, biochemical, inorganic, organic, and physical chemistry.
